

Global Logistics and Supply Chain Management Depot Management

The logistics of dealing with effective storage, shipping and regulatory compliance can be a complex and complicated process. However, with multiple global facilities for distribution, Bilcare provides you with the unique capability of a real-time distribution process using a simple and effective local management model.

Drug Storage & Distribution Services

We store and ship your materials to sites worldwide, and provide reconciliation and destruction of returned goods. Your products are handled by Technicians and Project Managers who are assigned to your account and available to answer any questions during the project duration. Other available services include:

- + Domestic and International shipping
- + Ambient/cold/frozen storage
- + Expanded storage for CI and CII substances
- + Global logistics management
- + Cold chain solutions
- + On-line tracking through our carriers
- + Regulatory and customer support
- + Integrated Interactive Voice Response System (IVRS) inventory/tracking
- + Registered importation, exportation and distribution of controlled substances

Returns & Destructions

Bilcare has the capability of handling any clinical return and destruction issues with services and solutions including:

- + Returns handled per customer specific protocols
- + Ample and secured storage
- + Regulatory compliance and documentation support
- + Updated and complete documentation on destruction

Why Bilcare Global Logistics?

- + Customized logistics and distribution solutions
- + 300% inspection on all shipments
- + Global distribution support (Americas, Asia Pacific, EMEA)
- + Specialized logistics project support

Controlled Substance Management

Bilcare is registered with the DEA as a Manufacturer, Distributor, Exporter, Importer and Analytical Laboratory of Controlled Substances.

Our Quality Process Ensures that We Have Delivered

- + The right product
- + The right site
- + The right timeline
